# Motivation of the Project

- Our project, which we have named “Green Island,” is based on the true story of Krakatau Island. Despite being completely destroyed by a volcanic eruption, life returned to once again make Krakatau a green island teeming with life.
- The story encompasses the important events on the island, from the time of the volcanic eruption to the present day, and is accompanied by black and white illustrations.

At the same time, the island is a symbol of the planet Earth, the only known island of life in the universe. We would be pleased if the project helped develop children's relationship not only to "their" planet, but mainly to our planet Earth, as this is the only way we can change our behaviour and the way we live. \_\_\_\_\_

# 1. Volcanic Island

## 2. Stones and Soil

# 3. Spider

# 4. Seeds

# 5. Animals

CD - methodology and supplement

# Graphic sheets

Dne 26. srpna 1883 se ozvaly ztýřilí mohutně \_\_\_\_\_. Ostrov  
 doslova povyskočil a rozmetal do vzduchu \_\_\_\_\_. Načež se pak ze  
 dvou třetin ponořil pod hladinu \_\_\_\_\_. Kameny létaly vzduchem až  
 \_\_\_\_\_ kilometrů daleko. \_\_\_\_\_ byl tak silný, že ho zaslechli až ve  
 vzdáleně \_\_\_\_\_.

# Worksheets

# Coloured cards

# How to work with the project

- Open for variety of using in school or as part of leisure activities (year's project, partly using to enrich teaching, ...)
- Recommended for children from 5 to 12 years old, English text available for kids (13-18 years)
- Applicable in various subjects !
- There are additional information for teachers
- Own ideas recommended ..... make your own „Green Island“ Project ! 😊

**We wish you a great deal of enjoyment as you discover the secrets of Green Island.**
